

**The Second Symposium on Future Challenges for
Carbon-base Nanoporous Materials: Adsorption and Energy
CBNM2010-Nagano**

September 24 Friday and 25 Saturday, 2010

We organized the first symposium on Future Challenges for Carbon-base Nanoporous Materials in 2007. The researches on carbon-based materials are increasing year by year. Graphene has joined in new nanocarbon families, promoting worldwide researches with the relevance to energy and environmental technologies. We need to have a fruitful time for the discussion on the related area. As International Conference on Nanoscopic Colloid and Surface Sciences will be held at Chiba September 20-22, we would like to offer another chance for intensified science atmosphere on Energy related topics at a representative resort area: Nagano (Winter Olympic Game was held)

The following scientists will be invited (Invited paper 20-25 min)

Professor M. Biggs	University of Adelaide, Australia
Professor M. Endo	Shinshu University, Japan
Professor K. Naoi	Tokyo University of Agriculture and Technology
Professor L. Radovic	Pennsylvania State University, USA
Professor P. Simon	Universite Paul Sabatier of Toulouse, France
Professor M. Terrones	Shishu University (University of Madrid)
Professor D. D. Do	The University of Queensland, Australia

A short oral presentation (10-15 min) and poster presentation are called.
If you hope to present a paper, please send me (Katsumi Kaneko) directly with e-mail.

Registration fee of 10,000 Japanese Yen (includes welcome reception, banquet, and excursion) can be paid on site.

As to the accommodation you are kindly asked to book your room by yourself. There are many nice hotels around Nagano station of JR Shinkansen (Tokyo-Nagano about 100 min) by a moderate rate. (Example: Hotel Metropolitan Nagano: around 12,000 Yen, Tokyu Inn: around 5,000 Yen)

Tentative program

Thursday Evening	Registration from 5 pm-7 pm, A simple reception
Friday morning	Invited papers and general papers
Afternoon	Excursion to Togakushi Height
Evening	Poster and Banquet
Saturday morning and afternoon	Invited and general papers
