

GCOE Special Lecture

Speakers: *Professor, Xiao Chang-Fa*
Prof. Cheng Bo Wen,
Prof. Wang Rui,
Prof. Jiang Yaming

Tianjin Polytechnic University, P.R. China

Title (Tentative): *『Development Situation of
Fiber materials in China』*

Date : **Friday, October 7, 2011 13:00-15:00**

Place : **Shinshu University, Research Center for Advanced
Science & Technology building, Meeting Room 1 , 7F**

Prof. Xiao Chang-fa: Professor Xiao Chang-fa is the Vice President of Tianjin Polytechnic University. He is engaged in research development and production of fiber material technology. Also, Prof. Xiao is known for research in areas of function fiber materials development, hollow fiber membrane forming and relationship of fiber structure and properties. He has presided more than 30 projects, including the Chinese Ministry of Science and Technology.

Prof. Wang Rui : Professor Wang Rui is the director of School of Textiles, Tianjin Polytechnic University. On top of teaching, he works as scientific research and management in “Textile Science and Engineering”. Prof. Rui is engaged in as the director of Chinese Cotton Textile Industry Association. More than 180 scientific papers were published in domestic and overseas journals and conference papers.
