Objectives of Graduate School of Medicine, Science and Technology

Our goal is to train individuals to become cutting-edge professionals and researchers able to contribute to society by using both the extensive knowledge and technical skills they have attained in one of the specialized fields of medicine, health sciences, science, engineering, agriculture, or biomedical science, and an ability to respond flexibly to a changing world. To this end, we aim to provide the opportunity to acquire the following competences, which we regard as essential in all the technical professions.

1. An ability to consider problems that lie beyond the usual scope of one's own discipline and by doing so form a new understanding of the social value of one's own research activity.
2. The sound ethical perspective needed by highly-qualified professionals and researchers engaged in the development of science and technology.

Intent of Working Student Special Selection

As science and technology have remarkably progressed and diversified, there is an increasing demand for individuals with rich creativity and high research capability in wide fields of society and strong leadership in research and development. Therefore the doctoral program of Graduate School of Medicine, Science and Technology accepts working professionals who are involved in research, development, and other activities in a company, research institution, educational institution, etc. We aim to deepen interactions between society and the university in education and research in response to the demand. Hence we offer a special selection for working professionals with expertise and academic capabilities sufficient to take a doctoral program.

Admission Policy

Common Admission Policy for All Graduate Schools

Shinshu University Graduate Schools proactively accept individuals who possess qualities such as those listed below.

- Individuals educated in a wide range of topics, possessing expertise in their field of study, and desiring to expand their knowledge
- Individuals who are full of intellectual curiosity and will independently tackle technical issues or issues facing the local community
- Individuals with profound intelligence and the ability to think logically, who are wise and virtuous and aspire to actively demonstrate leadership in various fields
- Individuals, concerned with issues facing society, the environment, and the international community, who wish to actively contribute to the global community by applying their creativity to these issues
- Individuals who wish to enhance their technical abilities and knowledge acquired from occupational experience

Admissions Policy of the Graduate School of Medicine, Science and Technology

Pursuant to the university's philosophy and the educational goals of the Graduate School, the Graduate School of Medicine, Science and Technology welcomes students who demonstrate the following capabilities and drive.

1. Those who are eager to undertake cutting-edge research in science, medicine, healthcare, welfare and technology.
2. Those who aim to be researchers leading the world in science, medicine, healthcare, welfare, and technology or who aim to be highly skilled professionals.
3. Those who have been proactive about their learning at undergraduate schools, graduate schools, companies, or medical institutions, and have acquired extensive expertise and technical skills and the ability to drive research forward.

You can download the Examination Card from My Page of the Internet application registration site after the examination number is confirmed.

An e-mail will be sent to your registered e-mail address to inform you of your examination number.

Please bring the printed Examination Card with you on the day of the examination. (Black and white printable)

※Please access the "applicant's knowledge" from the URL described in the e-mail, print and read the notes carefully. If you do not receive the e-mail, please log in to the online application website by the day before the examination, print the card and bring it with you on the day of the examination.

Cautions regarding Applications

- ① If there is any deficiency in the application document, the applications will not be accepted.
Be sure to fill in all required information completely and accurately.
- ② Personal computers can be used to fill in application documents prescribed by Graduate School of Medicine, Science and Technology.
- ③ All postal mails such as a notice of an admission decision and documents for admission procedures will be sent to the current address that applicants provide on the online application registration site.
If there is any change in the address, applicants must inform the Admissions Office immediately of it by email. Email address of the Admissions Office (Matsumoto Campus; Graduate School Office) is "sogoiriko-ao-ml@shinshu-u.ac.jp"
- ④ Application documents and an application fee will not be returned under any circumstances after the submission and payment. However, full or part of the application fee will be refunded upon request of applicants if applicants have inappropriately overpaid an application fee or they did not apply after having paid an application fee (i.e. application documents were not submitted or application was not accepted). In case of overpayment, only the overpaid amount should be refunded. For details of refund procedures, visit Admission page of Shinshu University website.
(https://www.shinshu-u.ac.jp/ad_portal/return/)
- ⑤ Get approval of the desired advisor before applications. A desired division and unit will not be allowed to be changed after an application has been submitted.
- ⑥ Successful applications will be withdrawn if any discrepancies are discovered between actual facts and information in submitted application documents.
- ⑦ Successful applicants who wish to have copies or reprints of their master's thesis and research achievements returned after an announcement of successful applications, inform the Admissions Office.

【IMPORTANT】

- Please submit the original documents (⑦ Official Transcripts, ⑧ Certificate of Graduation and Completion (or Expected Completion)).
- Applicants who have a graduate degree are required to submit a certificate with specific degree name.
- Documents to be submitted vary from person to person. Confirm which documents you must submit in the list of page 8.
- Please do not submit any documents other than the application documents, as they will not be accepted.

9. Special Measures for Working Student Special Selection

(1) Special Educational Methods as Stipulated in Standards for Establishment of Graduate Schools

In recent years, there is an increasing social demand that working professionals such as engineers, teachers, and researchers resume their education in graduate schools. However, they tend to have less chance to pursue their education in graduate schools because they must leave their work for at least three years to study in graduate schools in case of a standard educational method.

Therefore, Standards for Establishment of Graduate Schools includes a stipulation to grant special consideration to working professionals: "With respect to graduate school programs, universities shall be allowed to offer education by appropriate methods including conducting lectures or research mentorship programs in the evenings or other specified times or terms only when it is deemed essential in terms of education."

Accordingly Graduate School of Medicine, Science and Technology offers education for working engineers, teachers, and researchers wishing to pursue their education in graduate schools by special education methods as stipulated in Standards for Establishment of Graduate Schools.

If students wish to request for the special measures for working students, discuss the following ① and ② with your desired advisor in advance and then submit a "Special Measures Request Report".

① Scheduling

With consent of your desired advisor, students can take certain lectures and receive research mentorship partially in the evenings or at other specified times. Generally, the time is scheduled during weekday evenings from 6:00 p.m. to 7:30 p.m. and Saturday from 9:00 a.m. to 4:10 p.m.

② Study Plan

Generally, students make a three-year study plan at the beginning of the first academic year under

mentorship of a desired advisor.

(2) Extended Study Program

Extended Study Program is a convenient study option for working students. Well-planned long-term study can facilitate their academic works and reduce tuition. Applicants for this program will be reviewed by the university. If permitted, they aim to obtain a degree by completing courses within a period of up to six years.

Students can apply for this program after the admission, but they must apply for it within 10 months after the admission. After the Application of Extended Study Program is permitted, the amount of annual tuition will change as follows:

[Annual tuition = Total tuition of standard doctoral program terms (three years) / Permitted total registered years (up to maximum six years)]

Note that the tuition that students have already paid in the first year is not subtracted.

If students wish to use this program, inquire a desired advisor in advance.

10. Security Export Control (for international students)

From the perspectives of exporting goods, providing technologies and people-to-people exchange, Shinshu University has established the Shinshu University Security Export Control Regulations in accordance with the Foreign Exchange and Foreign Trade Act to develop the system of export control. International students subject to such legislation should have sufficient discussions with their academic advisor prior to applying to our university, and should note in advance that:

- If they fall under any of the regulated matters, they may not be able to receive the desired education or their research activities may be restricted after enrollment.
- If regulation is tightened due to amendment of the law, or for any other reason, the student may be unable to continue research already under way.

cf. the Shinshu University Security Export Control Regulations

11. Doctoral Student Support Programs

Shinshu University offers scholarship programs to support outstanding doctoral students. Economic assistance is provided to doctoral students so they can focus on their research without financial worries. We hope this program serves as a reference for those considering pursuing a doctoral degree. Applications are accepted once a year. For more details, please visit the program's website (<https://www.shinshu-u.ac.jp/graduate/spring/>).

1. Next Generation Advanced Human Resources/Regional Innovators Development Program

or 「次世代高度人材『地域発科学技術革新志士』育成プログラム」

(JST SPRING: Support for Pioneering Research Initiated by the Next Generation program)

Economic support in the form of living expenses (2.4 million yen per year) and research expenses (300,000 yen per year) is provided to outstanding doctoral students.

Additionally, activities such as student exchanges facilitated by the "Shinshu Tamonjuku" and regional implementation projects are carried out.

2. Sustainable Society AI Project

or 「サステナブル・ソサイエティ AI プロジェクト：知識と技術の調和に向けた挑戦」

(JST BOOST: Broadening Opportunities for Outstanding young researchers and doctoral students in STRategic)

Economic support in the form of living expenses (3 million yen per year) and research expenses (900,000 yen per year) is provided to outstanding doctoral students conducting research in the next generation AI field.

Furthermore, activities such as training programs led by AI researchers and interacting with students are implemented.

12. Others

- (1) Applicants must bring the Examination Card with them to an academic test.
- (2) The Admissions Office will not assist with arrangements for accommodations.
- (3) The Admissions Office inform you about “Student Application Guidelines” and “Application Procedure Documents” only by website. Download them from the following URL.
